## EDUCATION

|                                                                                                                          |                                        |
|--------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>Sri Sai Institute of Technology and Science (SSITS)</b><br>Bachelor of Technology in Computer Science and Engineering | Rayachoty, AP   2024 - 2028 (Expected) |
| <b>Sri Chaitanya Junior College</b><br>Intermediate (12th Standard) - Board of Intermediate Education   Aggregate: 87.8% | Vijayawada, AP   2024                  |
| <b>Vignan High School</b><br>Secondary School Certificate (10th Standard) - AP SSC Board   Aggregate: 88.1%              | Rayachoty, AP   2022                   |

## TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Web & Cloud:** React.js, HTML5, CSS3, Firebase, Cloud Firestore, REST APIs, Serverless Architecture
- **AI & Machine Learning:** TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, Computer Vision, ArcFace, ONNX Runtime, FAISS
- **Mobile Development:** Flutter, Firebase Mobile SDK
- **Tools & Analytics:** Git, GitHub, Tableau, Power BI, MS Office
- **Core Engineering:** Data Structures & Algorithms, RESTful APIs, Serverless Micro-Architecture

## TECHNICAL PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Aryanetix – Smart Institutional Management SaaS Platform</b><br>- Engineered an enterprise-grade institutional ecosystem integrating SuperAdmin, Principal, Teacher, and Student roles.<br>- Designed Face Recognition Engine V2 featuring ArcFace, ONNX Runtime, 512D embeddings, FAISS vector search, and anti-spoofing.<br>- Implemented multi-modal attendance including voice attendance, LMS integration, attendance analytics, and accessibility mode.<br>- Built secure architecture with AES-256-GCM encryption, Cloud Firestore serverless backend, and Flutter cross-platform mobile app. | <a href="#">aryanetix.dev</a> <a href="#">887654321.workers.dev</a>                                                      |
| <b>ExamMap – University-Focused Intelligent Study Planner</b><br>- Developed an intelligent academic schedule planner helping university students track syllabi, attendance thresholds, and backlogs.<br>- Implemented personalized study roadmap generation with automated exam revision countdowns and real-time alerts.                                                                                                                                                                                                                                                                              | <a href="#">React.js</a> , <a href="#">Firebase</a> , <a href="#">Cloud Firestore</a> , <a href="#">Web Technologies</a> |
| <b>Flight Ticket Booking System</b><br>- Built an end-to-end flight booking web application with real-time seat inventory, schedule lookup, and passenger data handling.<br>- Configured Firebase backend rules to maintain transaction integrity and secure booking histories.                                                                                                                                                                                                                                                                                                                         | <a href="#">Firebase</a> , <a href="#">Cloud Firestore</a> , <a href="#">JavaScript</a> , <a href="#">HTML/CSS</a>       |
| <b>eBook Store – Digital Reading &amp; Commerce Platform</b><br>- Created a responsive e-commerce web platform for browsing, previewing, and purchasing digital books.<br>- Integrated shopping cart management, subscription tiers, mock payment workflows, and responsive UI layout.                                                                                                                                                                                                                                                                                                                  | <a href="#">JavaScript</a> , <a href="#">Web Technologies</a> , <a href="#">Payment Integration UI</a>                   |

## CERTIFICATIONS & ACTIVITIES

- **Quantum Computing Certification** Foundational quantum principles, qubits, quantum gates, and computing concepts.
- **IBM CSR Box Certification** Technical skills curriculum covering emerging technologies and professional readiness.
- **Innovation & Activities:** Hackathons, SaaS product architecture, AI/ML experimentation, and institutional software development.

## LANGUAGES

English (Professional Working Proficiency) • Telugu (Native / Fluent) • Hindi (Conversational)
